Recruiting neuroscience Research Assistant

Recent college graduates with an interest in *molecular neurobiology* and *developmental neuroscience* are encouraged to apply for a research assistant position in the Pouloupolous Lab at the University of Maryland School of Medicine in downtown Baltimore. This position would be ideal for applicants with an interest to participate in primary neuroscience research before moving on to graduate studies.

The position is in a newly established lab currently being staffed, and the candidate would be intimately involved in all aspects of setting up molecular, microscopy, and rodent surgical methods from the ground up, and be centrally involved in both the intellectual and experimental aspects of the lab’s projects. Prior lab experience in molecular biology, histology, animal handling is appreciated though not required. More details on the lab’s research can be found at poulab.org. Applicants should express interest by email to apouloupolous@som.umaryland.edu
