Two Undergraduate Research Assistants are needed in the Bakker lab to assist with manually drawing regions of interest on brain scans. The specificity of our drawings helps improve functional analysis and can be used to obtain volumetric measures of different brain structures.

Students must participate in this research experience for credit; preference will be given to those who would be able to commit 3 credits worth of work per semester and are willing to work through the following academic year.

To apply, please contact Katie Tobin at ktobin4@jhu.edu for an application.

Two Undergraduate Research Assistants are needed in the Bakker lab to assist in collecting behavioral data. Research assistants will be trained on collecting behavioral data from psychological behavioral experiments.

All research assistants will be required to commit 3 credits worth of work per semester (9 hours a week) and a two-semester commitment. To apply, please contact Tammy Tran at tammy.tran@jhu.edu for an application.
