The Obsessive Compulsive Disorder (OCD) Research Program at Brown Medical School/Butler Hospital is seeking two full-time research assistants to work on an NIMH-funded R01 investigating dimensional endophenotypes in anxiety and OC spectrum disorders. Primary responsibilities include participant recruitment and screening, data collection/management, clinical assessment, and administration of cognitive-affective assessments.

The ideal candidate will have a Bachelor’s degree in psychology, neuroscience or related field, be very detail oriented, have excellent oral and written communication skills, and be able to work independently as well as within a team setting on multiple tasks. Prior experience with psychophysiological assessment and neuroimaging is a plus. This position will begin in Summer 2018 and a 2-year commitment is strongly preferred.

Interested applicants are invited to learn more about the position and submit their CV AND cover letter here:

Applications will be accepted until the position is filled. For questions regarding this position, please contact Tina Boisseau, PhD (christina.boisseau@brown.edu).
