Monday  
May 15, 2017  

10:00 am Ernst Niebur (Johns Hopkins University)  
Introduction  
10:30 am Lothar Spillmann (National Taiwan University)  
Fading and filling-in and the perception of extended surfaces  
11:30 am Ken Nakayama (Harvard University)  
The subjective contour as border ownership readout  

2:00 pm Anitha Pasupathy (University of Washington)  
Cortical processing of visual occlusion  
3:00 pm Hidehiko Komatsu (National Institute for Physiological Sciences, Japan)  
Neural processing of Shitsukan - perception of materials and surface qualities of objects  

Tuesday  
May 16, 2017  

9:00 am Doris Tsao (California Institute of Technology)  
Constructing a coherent account of a visual scene: Interactions between face patches and retinotopic cortex  
10:00 am Margaret Livingstone (Harvard Medical School)  
Functional Modules: How do we get them and what good are they?  
11:00 am Pieter Roelfsema (Netherlands Institute for Neuroscience)  
Thinking and perceiving with the visual brain  
12:00 pm Rüdiger von der Heydt (Johns Hopkins University)  
Conclusion
