Biweekly Reflection Questions

When writing your biweekly reports, please use the questions below as a guide. You are not required to answer every question, but they should help you to collect your thoughts and think critically about your experience. Preparing biweekly reports will make the synthesizing assignment much easier at the end.

• What were the two or three things that surprised you the most about your Applied Experience?
• What did you worry about, fear, or have concern about before going into your Applied Experience?
• How did you feel about those same things at the end of the experience?
• What were the most important lessons you learned through your Applied Experience?
• What did you find to be the biggest challenges in your work with the community?
• Who was the person with whom you shared the most? What did you learn about him/her that made an impression on you?
• What event during the time you were working in the community made the biggest impression on you and why?
• What skills were strengthened by your Applied Experience?
• What challenge did you rise to? How will that affect the way you act in the future?
• In what ways have you changed because of your Applied Experience?
• How has your Applied Experience contributed to your understanding of other course work at JHU?
• Describe a picture, a snapshot, of a significant moment that happened during your Applied Experience. What makes that specific moment significant for you?
• Tell the story of a significant interaction between you and a community member, patient, or client in the Applied Experience you were involved in.

Please note that your biweekly reports should be submitted through Blackboard.
