Class Notes

Living With Loss Support Group

Dealing with the loss of a loved one can lead to complicated emotions. It can be beneficial to share these feelings with others who are also experiencing grief. The focus of this group is to provide a safe space for students to share their feelings regarding their loss. Group topics will also include the grief process, fears related to loss, and coping strategies.

For more information please call the JHU Counseling Center 410-516-8278 or email Dr. Susana Ferradas sferrad1@jhu.edu
Second James D. Goodyear Public Health Service in Baltimore Award

The Public Health Studies program is now accepting applications for the second James D. Goodyear Public Health Service in Baltimore Award. Named in honor of the former Associate Director of Public Health Studies, this award will provide a stipend of $3000 to one Public Health Studies undergraduate student per year, allowing the student to complete an otherwise unpaid public health service internship based in Baltimore City.

Applicants must have already secured an internship for the summer of 2017 in order to be considered for the award. An application essay, describing the scope of the internship and its relevance to your career development, current academics and future goals is required. Click this link for complete requirements and the application.

Applications are due to Caroline Barry by 5pm on April 10th, 2017. Contact the Public Health Studies office with any questions. If you would like to donate to the Goodyear Award fund, you may do so here.

Politik Focus, Johns Hopkins’ first and only online political video series, invites you to learn more about the world of broadcast journalism!

Our team produces news segments, roundtables, and interviews concerning current events. We provide a unique opportunity for students to gain hands-on experience in broadcasting, producing, writing, and directing. If you want to help shape public opinion on campus and are interested in media, politics, and current affairs, fill out this form:https://docs.google.com/forms/d/1-8zYkxsRi9v8iV1zrAZtq8oYSLAwmUuV3a8x_KV25EI/viewform?ts=58990172&edit_requested=true (its super short, we promise!) or join us at our weekly meeting on Sunday, 4pm, Mattin 161.

For more information email Politikfocus@gmail.com. Also, be sure to check our Facebook page at https://www.facebook.com/politikfocus/ and our Youtube page at https://www.youtube.com/channel/UC1xUwhr73IC-xlHyEgi7E1w.
This event provides a convenient location for organization and agency representatives from around the country to gather and discuss organizational functions, employment opportunities, consultancies, internships, and career information. The fair is open to all undergraduate and graduate students.

The event will take place in Feinstone Hall and the 1st Floor Gallery. Pre-registration is not necessary; however you will be required to sign-in. Business attire is strongly recommended

Click here for more information.

China Data and GIS Workshop

There will be an exciting training opportunity on China (and US) data and GIS coming up next month (12pm-3pm, March 2, Thursday) at the MSE Library, Johns Hopkins University. This half day event includes half an hour introduction to data and GIS services at MSE Library, JHU by Mr. Jim Gillispie, head of Data and GIS Services JHU, and a two-hour workshop on China and US economy and health data and GIS by Dr. Bao Shuming, director of China Data Center, University of MI.

Please RSVP now by registering via this link.

First Annual Pre-Health Convention
March 30 – April 2, 2017
Norfolk Waterside Marriott in Norfolk, VA
This four-day conference is aimed at empowering all students interested in pursuing a career in healthcare by bridging their access to our distinguished selection of keynote speakers, admissions panels, and workshops within a variety of health professions. This unparalleled networking experience gives students an opportunity to explore a number of health professions and meet with a vast number of Deans, Vice-Presidents, Directors, and Advisors from the country’s premier healthcare schools, as well as interact with a number of exceptional leading experts and trailblazers in healthcare.

Community-Driven Research Day

Friday, March 3 from 1:00 to 4:00 p.m.
Johns Hopkins Welch Medical Library, 2nd floor, 1900 E. Monument Street, Baltimore, MD 21205
Register here.

Community-Driven Research Day is an opportunity for community-based organizations and city agencies to share their research questions and needs with students and faculty from Johns Hopkins and other local universities and to identify potential collaborations.

Global Health & Innovation Conference

Attend or present at the upcoming 14th annual Global Health & Innovation Conference (GHIC) at Yale on April 22-23, 2017. GHIC is a must-attend event that convenes more than 2,000 professionals and students who are interested in all aspects of health, development, and social entrepreneurship.

The Global Health & Innovation Conference is the world’s largest and leading global health conference as well as the largest social entrepreneurship conference. Please feel free to forward this announcement to others who may also be interested in attending or presenting.

Learn about the GHIC experience: Watch a new short video about the conference here.

Clinton Global Initiative University (CGI U) Application Now Open

10th annual CGI U meeting will be held at Northeastern University, October 13-15

We are excited to announce that the CGI U 2017 meeting will take place at Northeastern University this fall from October 13-15. Hosted by President Bill Clinton and Chelsea Clinton, the 10th annual CGI U meeting will gather more than 1,000 innovative student leaders to make Commitments to Action that address some of the world's most pressing challenges. More than $750,000 in funding will be available to select CGI U 2017 students to help them turn their ideas into action.

The early decision and travel assistance deadline is March 1, 2017, and the final application deadline is May 1, 2017. Program details and featured speakers will be announced at a later date.

Click here to apply.
Are you passionate about healthcare, entrepreneurship, or public health?

Join MDJunior today! We are a student-run 501(c)3 nonprofit organization that mobilizes high school and college students across the world to bridge the health gap. With an expanding network of students and mentors spanning the world, MDJunior is looking to establish its headquarters at Hopkins.

We are recruiting motivated leaders that are interested in social entrepreneurship and working with a dynamic team to make an impact.

As a member of MDJunior HQ (our core, national executive team), you will get the opportunity to be at the forefront of the public health community building that MDJunior leads. You will also have the opportunity to develop your leadership skills, expand your knowledge in public health, and gain experience with service learning.

The application can be found here: https://goo.gl/forms/fMJW0sqMlyL743VH2
St. Jude Graduate School of Biomedical Sciences
At St. Jude Children’s Research Hospital

Introducing an extraordinary new PhD program at one of the world’s premier research and treatment centers for pediatric cancer and childhood disease.

With leading-edge science, unparalleled resources, and an immersive clinical experience, our graduate program is designed for innovative, research-oriented students who will help discover the next generation of cures.

Throughout your doctoral training, you will be supported by a generous stipend and benefits, extraordinary core facilities, and a collaborative, close-knit research environment — all in the heart of the vibrant city of Memphis.

Accepting applications September 1 – December 1, 2017.

Associate Professor, Health, Behavior and Society

Suzanna Pertl, JD
Public Interest Lawyer and Human Rights Advocate

MODERATOR:
Keshia Pollock, PhD, MPH
Associate Professor, Health Policy and Management
Director, Institute for Health and Social Policy

Applied Experience
Research Opportunity - Department of Environmental Health and Engineering, JHSPH

Each year thousands of Baltimore communities' pets end up at county/city open admission shelters. The vast majority of these pets are either abandoned or given up by low-income or middle-income families because they cannot afford to care for them or are losing their family home, apartment, or job and must move to a place that does not allow, or charges a security deposit for, having a pet.

Many of the people giving up their pet(s), do not have knowledge of or know how to access resources to help them protect their assets and/or provide a "bridge" until they can get on "stable footing" again.

We propose a study that would examine whether it is possible to use this visit to the county/city shelter as an intervention point for people who are (1) close to losing their homes; or (2) having trouble with their landlords. Such an intervention would allow us to identify families at risk and intervene BEFORE they were evicted, or before landlord/tenant problems became severe. It would also reduce the number of animals "turned in" to the shelters.

See more information [here](#).

---

Korean translator needed for the Global Obesity Prevention Center

Korean translator needed for the various intervention projects in Baltimore through the Global Obesity Prevention Center. The translator will assist our interventionist in store recruitment, translation of promotional materials, training materials and data collection instruments, as well as in intervention activities. Tasks may include regular communication with Korean American store owners via phone and in person visits, store recruitment visits, educational interactive sessions and taste tests, and collection of process evaluation data which may include sales recalls, store environmental assessments, and interactive session process forms.

Internships & Service

Looking for an applied experience opportunity or something productive to do during summer break? Interested in doing public health-related work abroad? Global Brigades is the world’s largest student-led global health and sustainable development organization. Public Health Brigades is one
of its branches and its mission is to empower rural communities to prevent common illnesses through in-home infrastructure development, community leader training, and health education. Our upcoming 7-day brigade is planned for the end of May and we are currently looking for volunteers! If you have any questions or are interested in coming on the brigade, please contact ehobbin1@jhu.edu for more information!

SBG Health Sciences Summer Internship

Are you interested in an internship with a growing Small Business team and organization? If so, then come join SBG Technology Solutions (SBG)! SBG is a Service Disabled Veteran Owned Small Business (SDVOSB), specializing in Engineering, Information Technology, Cyber-Security and Training. We are seeking a results-oriented Health Sciences Intern. The ideal candidate for this exciting position, is someone who has a positive and energetic attitude, is hard-working, and possesses the ability to support a fast-paced government contractor. The location of performance is at SBG’s headquarters in Alexandria, VA which is Metro accessible.

Overview:
We are seeking a dynamic Health Sciences Intern to support the Health and Benefits division team with daily functions within the division. The Health Sciences Intern will provide administrative assistance to a variety of project managers and leads in the Health and Benefits division including working on a variety of special projects. Intern candidates should be transitioning from their junior to senior year in college and have health sciences as their major.

Primary Responsibilities:
· Administrative reception duties to become familiar with SBG’s client base
· Filing and organizing contractual documents
· Reviewing technical business proposals for clarity and cohesiveness
· Providing miscellaneous technical support to portfolio managers
· Other duties as assigned

Requirements:
· Completed junior year and transitioning to senior year in college.
· Possess proven organizational skills with a strong attention to detail and the ability to prioritize and work well in an environment with dynamic demands.
· Possess excellent verbal and written communication skills.
· Proficient with Microsoft Office tools (i.e. MS Word, MS Excel and MS PowerPoint).
· Flexibility and adaptability; able to shift attention and focus to different priorities.
· Pursuing a health sciences related degree.

Please visit us at www.sbgts.com and if you are interested this opportunity, please do not hesitate to send your resume tokthomas@sbgts.com. We look forward to hearing from you. Please include a cover letter on “Why you would be an ideal candidate for the Health Sciences Internship position”. Resumes without a cover letter will not be considered.

Global Health Established Field Placements (GHEFP) and Global Health Field Research Award (GHFRA) Deadlines Approaching!
This is a reminder that the deadlines for the Global Health Established Field Placements (GHEFP) and Global Health Field Research Award (GHFRA) are approaching! The due dates are listed below - late applications will not be accepted!

GHFRA: Wednesday, March 01, 2017 at 11:59pm

The GHEFP is intended for eligible masters, doctoral, and undergraduate students to work at one of 85 faculty placement sites. The GHFRA is intended for students who have a developed relationship with a faculty mentor and seek to conduct independent research within that faculty member's existing project.

For more information about the application process or FAQs, see our website: GHEFP and GHFRA. Contact Nina Martin (nina.martin@jhu.edu or 410-502-9871) with other questions.

### Division of General Pediatrics and Adolescent Medicine (School of Medicine) 
Research Program Assistant Position

Supervisors: Errol Fields, Mudia Uzzi and Anthony Morgan  
Salary: $15 per hour  
Schedule: Up to 15 hours per week  
Employment Period: ASAP to May 19, 2017

Study Overview: The Research Program Assistant will support the research team on two studies that explores Young Black Men who have sex with Men (MSM) engagement with Geosocial Networking (GSN) smartphone applications and its implications on sexual health.

Purpose of Job: Provide clerical support in a research environment. Collect and/or organize study data through outreach, interviews and data entry

Job Qualifications: High School diploma/GED, Good written and verbal communication and interpersonal skills; Strong administrative skills and attention to detail

Applicant Instructions: To apply for this position send an email inquiry to Mudia Uzzi (mudia.uzzi@jhu.edu) and state your interest in the position and your qualifications. Please also attach an up-to-date resume.

### Johns Hopkins Hospital Administrative Internship

The Johns Hopkins Hospital Administrative Internship is a yearlong, paid full-time position aimed at highly motivated individuals who are interested in pursuing a career in medicine and are currently looking for gap-year opportunities. The internship is designed to provide aspiring
physician leaders with a comprehensive learning experience at a premier academic health system. Program participants will be exposed to hospital operations and leadership through project-based work. Project opportunities will vary and reflect both the participant’s learning goals and the needs of the hospital. In addition to project work, candidates will have the opportunity to attend senior leadership meetings and gain exposure to various health system functions. Prior to beginning, the selected intern will finalize goals, expectations, and evaluation criteria with Executive Leadership and the Internship Program Manager. For more information on the internship or to apply, please see the linked document.

### Meridian Summer Internship

The Meridian Summer Internship program offers a great way to explore career choices and gain real-world business experience. Meridian offers paid internships that allow you to gain an understanding of corporations and the healthcare industry while developing meaningful relationships. Internships are offered in areas like healthcare coordination, finance, communications, and more.

More information available [here](#).
Visit [www.mhplan.com](http://www.mhplan.com) to apply.

### Research in Maternal & Child Health

The Child & Adolescent Health Measurement Initiative (CAHMI) at Johns Hopkins School of Public Health is looking for a motivated, self-directed intern. The **Spring Undergraduate Maternal and Child Health Measurement Research Network Internship** position will primarily work on our Maternal and Child Health Measurement Research Network (MCH-MRN) project, with a focus on website upkeep, outreach and dissemination, and creation of documents for topical Technical Working Groups (TWGs).

More information and application requirements [here](#).

### World Health Organization, Substandard and Falsified Medical Products Group

The Safety and Vigilance (SAV) Unit within Regulation of Medicines and other Health Technologies (RHT) is looking for an intern to work on the Global Surveillance and Monitoring System for a minimum period of two-three months in the summer of 2017 (timeline is flexible).

The World Health Organization (WHO) has a mandate to tackle substandard, spurious, falsely labelled, falsified and counterfeit (SSFFC) Medical Products, as part of WHO’s fundamental role in protecting public health. There is a recognized lack of reliable and verified data of the global scope, scale and harm caused by SSFFC medical products. In response, WHO has developed the Global Surveillance and Monitoring System (GSMS), which is designed to significantly improve the quantity and quality of data on SSFFC medical products, whilst providing operational support when and where required. Further information on the activities of the GSMS is available [here](http://www.who.int/medicines/regulation/ssffc/en/).

More information [here](#).
National Association of Health Services Executives, Baltimore Chapter
Summer Internship Program 2017

The NAHSE Internship Program is a summer enrichment program in health and health services administration for talented undergraduate and graduate students who possess the aptitude and skills required to work in a complex multidisciplinary healthcare environment. The Program Includes:

- 8 - 10 week practical work experience in a healthcare organization
- Summer internship stipend (compensation based on level of education)
  - Assigned mentor and preceptor
  - Educational and developmental seminars
- Free attendance at NAHSE, Baltimore chapter meetings and seminars

Information packet and application [here](#)

Internship with The University of Michigan Center for Value-Based Insurance Design

The University of Michigan Center for Value-Based Insurance Design (V-BID Center) currently has openings for the 2017 Undergraduate summer internship program. This is a paid position located at the North Campus Research Center in Ann Arbor, MI.

As a non-profit embarking on its 12th year of growth and success, the V-BID Center leads in research, development, and advocacy for innovative health insurance plans. Since its inception, these values have inspired important public policy ventures as the Center has positioned itself at the heart of the national healthcare and reform debate.

The V-BID summer internship program affords undergraduate students the opportunity to integrate themselves into the vast, fast-paced world of public health policy. Upon joining our multidisciplinary team, interns will participate in hands-on, collaborative experiences as they gain a better understanding of various facets of health care policy. Throughout the Summer, each intern and their unique contributions will become an integral asset to our work.

The National Cancer Institute is now accepting applications for the 2017 HCIP class!

Applications for the 2017 HCIP class are due by March 13th.
Apply online! Please visit the [HCIP website](#) for more information:

The National Cancer Institute (NCI) is the Federal Government's principal agency for cancer research and training and is the largest of the 27 institutes and centers comprising the National Institutes of Health (NIH). The NCI recognizes that health information dissemination is key to raising public awareness about new cancer treatments, support for cancer patients and their families, and prevention strategies. To that end, in 1975 the NCI established the Health Communications Internship Program (HCIP) to attract individuals interested in careers in health communications and science writing.
The HCIP gives highly qualified graduate students and recent graduate degree recipients the opportunity to participate in vital health and science communications projects at NCI. Interns are placed in host offices at one of the three NCI campuses in Maryland.

| HCIP interns are offered six or 12-month internships in one of two tracks: |  
| Health Communications or Science Writing. |

**Health Communications Interns:**
- Plan, develop, and promote cancer education programs and materials for the public, cancer patients, or health professionals
- Gain experience in pre-testing and evaluating cancer prevention and treatment messages, publications, materials, and programs that reach the American public
- Participate in professional meetings and training seminars

**Science Writing Interns:**
- Write fact sheets and press releases
- Answer inquiries from the press
- Attend and report on scientific meetings
- Participate in professional meetings and training seminars

Additional information about this program, including an online application can be found by visiting [https://hcip.nci.nih.gov/index.html](https://hcip.nci.nih.gov/index.html).

**Cyber-HealthGIS - Multidisciplinary Research Experiences in Spatial Dynamics of Health**

We are pleased to announce that the National Science Foundation-funded interdisciplinary REU Site: "Cyber-HealthGIS - Multidisciplinary Research Experiences in Spatial Dynamics of Health" at Texas A&M University in College Station, TX is currently accepting applications for the 2017 summer.

[http://cyberhealthgis.tamu.edu](http://cyberhealthgis.tamu.edu)

This 10 week program invites undergraduate students from all disciplines who are interested in pursuing research at the intersections of technology, geospatial analysis, mapping & visualization, and human health and well-being.

The program seeks to bring together 10 undergraduate students for this summer, with 1/3 coming from Geography & GIS, 1/3 from Computer Science & Engineering, and 1/3 from Public Health, Bio, and Pre-Med programs. Students from allied STEM disciplines with interests that match the program are invited to apply as well. All you need is a passion for geography, technology, and/or health!

Participating students will be provided with funding for a stipend/salary for the whole summer, funding for housing and meals during summer-long program, and funding for transportation to and from College Station TX. College freshman, sophomores, and juniors as well those who will be graduating in December of 2017 are welcome to apply.
The application deadline is March 15, 2017 so please apply as soon as you can!!

We are particularly seeking to recruit members of underrepresented groups in science which include but are not limited to women, persons of color or other minority groups, veterans, persons with disabilities, as well as those from two- and four-year College and Universities that do not provide students with opportunities to engage in undergraduate research.

Summer Institute website: http://mcgill-idgh.ca/

Deadline: You are encouraged to apply early as evaluation for acceptance is rolling. Registration closes April 24th.

Fellowships & Grants

Consortium for Advanced Studies Abroad (CASA) in Cuba (Summer) Healthcare in Cuba: Cultures and History of Medicine/Spanish for Healthcare Workers

At a Glance:
Two Courses: Healthcare in Cuba: Cultures and History of Medicine and Spanish for Healthcare Workers
Credit: Each course is worth 4 U.S. semester hours/credits
Pre-requisite: No pre-requisite for Healthcare in Cuba course (taught in English); two years of college-level Spanish or equivalent required for Spanish for Healthcare Workers course
Approximate Dates: June 3 - July 1, 2017
Application Deadline: March 15, 2017

Recruitment for the 2017-18 Health for America (HFA) at MedStar Health Fellowship

The 2017-18 Health for America (HFA) at MedStar Health fellowship is a 11-month, paid health innovation fellowship for young professionals who earned a bachelor’s degree between January 2014 and July 2017. Applications will be accepted until Feb. 24, 2017.
Each year, HFA brings together an interdisciplinary team of four young leaders with passion and fresh perspectives to improve health care. HFA fellows are immersed in the healthcare system, educated in design thinking and lean startup methodologies, and empowered to build a novel, sustainable solution to an assigned health challenge (e.g., stroke for the 2016-17 HFA fellows).

HFA often attracts those who studied health, business, engineering, and design, yet applicants can come from any background and don’t need experience in a specific domain to qualify. We deliberately select fellows with diverse experience to create an interdisciplinary, unique team. The fellowship is open to those with both undergraduate and graduate level experience, though applicants must have earned their first bachelor’s degree between January 2014 and July 2017.

**Additional Health for America at MedStar Health Recruitment Resources:**

**2017 Public Service Scholars Summer Fellowships**
**All applications are due on March 15th.**
**Priority Deadline is March 1st.**

Public Service Scholars programs provide **paid fellowships** for Maryland’s "best and brightest" college students. Fellows are placed in full-time summer internships in **government agencies** or **nonprofit organizations** across the state, and are mentored by senior-level professionals. Fellows attend seminars, trips, and events with their cohort, have the opportunity to learn from and network with state leaders and program alumni, and work on substantive projects culminating in presentations to Maryland’s leaders.

Eligible students...
...are attending a Maryland institution (public or private)

**OR**

...are a Maryland resident attending school out of state

...will be a Junior or Senior in Fall 2017 or graduate student (eligible only for the Nonprofit Leadership Program)

...are in any major

...have a GPA of 2.7 or above

...will be available during summer 2017 program dates

...have an interest in public service

For more information visit [publicservicescholars.umbc.edu](http://publicservicescholars.umbc.edu).
Internship Opportunities at Greentech’s U.S. Biologics Technical Development

Genentech's U.S. Biologics Technical Development (USBTD) develops, delivers and supports robust, cost-effective production methods and technologies. The group has long been recognized as a world leader in developing large-scale manufacturing processes, sophisticated analytical methods and effective drug delivery systems. To learn more about our research and development processes, check out our Making Medicine site. We have numerous opportunities for current students and recent graduates in engineering and science programs alike to help deliver the future of medicine to patients.

For current undergraduate and graduate students:
Genentech’s internship programs offer undergraduate and graduate students the chance to work at one of the leading companies in biotechnology. See flyer attached for more info. For consideration for a summer internship (3 months) or a spring/fall internship (6 months) opportunity, apply to JobID 00448594 (Spring Intern), 00448599 (Summer Intern) or 00448587 (Fall Intern) on gene.com/careers and submit your resume to Handshake (tracking code: 478561 for Summer 3-month internships, 478560 for Spring/Fall 6-month internships).

For undergraduate and masters level students in the Class of 2017 and recent graduates:
Genentech offers a variety of rotational programs geared towards giving recent graduates in-depth training and skill development. Students looking to gain experience in USBTD should apply to the Process Development Rotational Program (PDRP). If technical operations leadership opportunities better suit your career interests, apply to Genentech’s Operations Rotational Development Program (ORDP). See flyers attached for more info on these programs. Applications for these programs are currently open and are accepted on a rolling basis so apply now to JobID 00448264 for PDRP or 00448553 for ORDP on gene.com/careers and submit your resume to Handshake (tracking code: 478737 for PDRP, 478742 for ORDP).

For more information, please email yang.jessica_p@gene.com ortschudi.katherine@gene.com.

Apply to the 2017 Baltimore HIV/AIDS Scholars Program

In a 10-week program, students conduct research under the direct mentorship of established Johns Hopkins researchers with the purpose of advancing science in the fields of HIV prevention and treatment that are specifically of relevance to the HIV epidemic in Baltimore City. Your specific research project will depend largely on research areas of our faculty. Overall, you can expect an experience similar to that of a first-year graduate student who does a three-month rotation in a laboratory or out in the community to become acquainted with the project, techniques, and people working in that area. While the style and character of each research site varies considerably, all are composed of very dedicated and hardworking individuals who are more than willing to help others who are similarly committed to learning. The program culminates with the development of a scientific abstract and poster presentation. The posters are presented to CFAR at the conclusion of the program and to the university community in the fall semester.
Apply via Handshake, but details can be found on the CFAR website and this flyer.

### Seeking research funding or National Scholarships?
Have you viewed the following options?

The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. In addition to the three main undergraduate research awards—Woodrow Wilson, DURA, and PURA—explore the additional links posted on the KSAS Research Site.

For a complete list of fellowships, grants, honors, and awards available to Krieger School undergraduates, visit the undergraduate academic advising site.

Students are also invited to look beyond the School of Arts and Sciences for research funding. Johns Hopkins is committed to providing support for students interested in applying for nationally competitive fellowships.

Learn more about the JHU National Fellowships and Scholarships Program.

---

### Employment

**The Congressional Budget Office (CBO) Seeks an Assistant Analyst for Health Analysis**

The Congressional Budget Office is a small nonpartisan agency that provides economic and budgetary analysis to the Congress. CBO's Budget Analysis Division seeks an Assistant Analyst to work within its two health analysis units. This position is open only to candidates who have or are completing a bachelor's degree; it is not for those who have or are completing a master's degree. This is not a permanent position: At the end of a two-to-three-year appointment, Assistant Analysts typically leave CBO to continue their education in such disciplines as economics, public policy, medicine, or the law.

Tasks will include monitoring Medicare demonstrations and the implementation of major health care legislation; collecting and analyzing data; conducting literature reviews; and developing and producing summaries, charts, and tables. The division's health analysts work closely with key Congressional staff on U.S. health care policy, preparing multiyear spending projections for federal health care programs such as Medicare, Medicaid, the health insurance marketplaces, and the Public Health Service.

Interested candidates should submit a cover letter, résumé, brief writing sample, unofficial transcripts, and contact information for three references online at [www.cbo.gov/careers](http://www.cbo.gov/careers).

[Click this link](http://www.cbo.gov/careers) for more information.
**Department of Anesthesiology & Critical Care Medicine (ACCM) Research Opportunity**

As part of its clinical research program, the ACCM department is searching for research assistants to help with the multitude of clinical studies/trials ongoing in the ORs and ICUs. We are interested in degree graduates seeking research experience/health care employment for at least 1 year. If you are interested, and would like more information, please contact Beth White, RN, research nurse manager at 443-287-5837 or ewhite11@jhmi.edu.

---

**Collective Health Recruitment: Member Advocates and Operations Associates**

The San Francisco-based healthcare startup Collective Health is currently looking for individuals interested in filling their Member Advocate and Operation Associate positions. Collective Health sells their product/service to large employers that self-fund their employee health plans. They provide an integrated administration of their clients’ health plans (medical, dental, vision, etc.) via one single platform, using both cutting-edge technology and beautiful design to make it simpler to understand, navigate, and pay for health care. Some of their current clients include eBay, Red Bull, Palantir, and they currently have around 60,000 members on their platform. Find out more information at their website.

If you are interested in applying for a position, send your resume to Dani DiPersia (the Johns Hopkins “Campus Captain”) at danidipersia@gmail.com. After this initial review, applicants will be invited to an info session (administered virtually) to learn more about the position.

---

**Center for Drug Safety and Effectiveness Research Coordinator**

The Johns Hopkins Center for Drug Safety and Effectiveness, housed in the School of Public Health, is looking for a Research Program Coordinator to begin as soon as possible. Research projects span a wide variety of topics and areas, including the prescription opioid epidemic, pharmaceutical regulation and pharmaceutical policy, as well as other areas related to drug safety and effectiveness. We work with a number of physicians, epidemiologists, pharmacists, biostatisticians, among other specialists. Candidates should have a background in epidemiology or public health.

Interested candidates can find the full job description and application here.

Send your resume, as well as any questions you may have, to Dora Lin at dlin25@jhu.edu.

**Research Program Assistant Positions at Hopkins Center to Eliminate Cardiovascular Health Disparities**

The Johns Hopkins Center to Eliminate Cardiovascular Health Disparities is hiring 9 part-time (18 hrs/wk) Research Program Assistants to help with patient recruitment, interviewing, surveying, tracking, and data entry for the RICH LIFE Project—Reducing Inequities in Care of Hypertension: Lifestyle Improvements for Everyone. We are committed to building a culturally diverse group and encourage applications from minority candidates. Full description posted on the Careers site here.
FDA Center for Biologics Evaluation and Research (CBER) Seeking Post-Baccalaureate Fellows

We are looking to fill 3 or 4 one-year post-bac positions in our bacterial genetics lab (under principal investigator Scott Stibitz) at CBER/FDA starting this summer. We are looking for recent grads with some experience with bacteriology and molecular biology. Post-bacs will be working on different projects (Staphylococcus aureus pathogenesis and genetics, Salmonella acid resistance, Shigella vaccine development, Bordetella genetics, and probiotic assay development), but all projects would involve a good deal of cloning and some protein expression. Our lab is within a research branch of the Center for Biologics Evaluation and Research (CBER), located in a new facility on the Food and Drug Administration headquarters main campus at White Oak/Silver Spring, Maryland.

Interested candidates should email their resumes to Roger Plaut at Roger.Plaut@fda.hhs.gov.

Clinical Information Manager (CMI)

The Emergency Medical Associates (EMA) is looking to hire individuals that can work as Clinical Information Managers (CIMs) / Medical Scribes in their Emergency Departments. The CMI position offers a unique opportunity to gain exposure to the clinical field.

Emergency Medical Associates (EMA) is one of the most respected emergency department (ED) practice organizations in the United States and treats more than 1 million patients annually, while serving more than 30 hospital clients. The company is widely recognized for clinical excellence, as well as the ability to increase patient volume, turn around ED operations, and improve and sustain patient satisfaction.

The CIM works in an Emergency Department to provide clerical/administrative assistance to the ED physician and/or practitioners. They prefer candidates who are interested in the healthcare field and have at least 100 hours working or volunteering in healthcare, and an academic background in sciences/pre-med classes. They currently have full time and part-time positions available in New Jersey, New York, Pennsylvania (Lebanon), and North Carolina! They are looking for current students and alumni for Immediate and Summer 2017 starts.

Being a CIM provides you with a competitive advantage by placing you a step ahead in your career development. If interested in learning more about this exciting CIM position with Emergency Medical Associates, visit their website.

Research Assistant Needed

The purpose of the position is to assist full-time faculty member in various projects including but not limited to health services research, community based participatory research projects in cancer and cardiovascular disease, grant development, literature searches and reviews, service learning programs, community-based health and organizations.
Rate per hour: $8-10
Hours per week: 6 – 10
Employment Period: July 1 – open
(The position is for Summer but it can be extended into the Fall Semester)

Click here for more information.

We are currently recruiting for two entry level positions, with multiple spots for each:

**Member Advocates:** Member Advocates are driven by empathy. We put the “care” back in healthcare. We shatter member expectations by providing above and beyond service. As experts in health benefits, Member Advocates are not only the face of the company, but are the voice behind innovation across every department. Through your experience at Collective Health, you will immerse yourself in the rapidly-evolving health insurance industry while mastering skills in operational efficiency, cross-departmental collaboration, and external professionalism.

**Operations Associates:** Each Operations Associate is part of a small team that runs every aspect of a customer's health plan – eligibility, claims, coordination of benefits, reinsurance. In this role, you will learn more about how insurance and healthcare actually work than any other position in the industry – you will essentially learn how to operate a healthcare insurance company. You will work across every department at Collective Health and be responsible for operating and scaling the core of our business. Through your experiences at Collective Health, you will become an expert in operations and in health care, while being at the forefront of transforming the industry. We're looking for candidates with a strong academic record. An interest in healthcare is preferred. Our approach in everything we do is collaborative, open and curious. We’re looking for more passionate, driven people to join our growing team.

Please reach out to Danielle DiPersia, Hopkins Class of 2014, with any questions!

Degree Programs

**University of California, Berkeley School of Public Health**

UC Berkeley School of Public Health offers a “practice-based” MPH that prepared leaders in public health through their unique approach, known as “The Berkeley Difference.” They offer MPH degrees in the following areas of study: Biostatistics, Environmental Health Sciences, Epidemiology, Epidemiology/Biostatistics, Health & Social Behavior, Health
The Master of Health Informatics program is a two-year, residential graduate program at the University of Michigan. Health Informatics is one of the fastest growing fields in the nation, and our graduates are in very high demand among employers: 100% of our graduates begin a career in their chosen field within six months of graduation, with an average starting salary of $74,000 per year. Our graduates work in a wide variety of settings, from clinics and hospitals to healthcare and technology consulting firms.

Health Informatics is a highly interdisciplinary field. Applicants from all academic and professional backgrounds are welcome and encouraged to apply. Current MHI students represent a wide range of backgrounds, including social sciences, natural sciences, life sciences, engineering, business, and the health professions.

To learn more about the program, join us at our upcoming MHI Virtual Information Session on Tuesday, March 7 at 1:00 p.m. (ET). We also hope you will post, circulate or otherwise share our program flyer with potential promising students. We would be delighted to connect with your students and share tips on the application process. The final domestic application deadline is May 1, 2017.
