Public Health News
Vice Provost for Diversity & Inclusion and Chief Diversity Officer Position Priority Suggestions

The Johns Hopkins University has begun a search for the first Vice Provost for Diversity & Inclusion and Chief Diversity Officer (CDO). Our CDO will serve as a thought leader and community convener on issues related to diversity and inclusion to promote a culture and climate that supports the success of all who learn, work, and engage in the Johns Hopkins Community.

Since this will be our first JHU CDO, the search committee would like to gather your feedback to help refine our scope of the position. Please briefly describe what you would envision as the top few priorities for the incoming CDO via this form.

Thank you for time and consideration!

Congratulations to Karen Masterson, a Finalist for the Excellence in Teaching Award

Karen Masterson was the instructor of a Public Health course called the Germ Theory in Literature.

If you have already sent a letter of support for a nominee of this award, you can just tell the committee who you think should win at teachingaward@jhu.edu.

If you have NOT sent a letter of support yet, please do and tell them why your favorite should win. Letters of support can come from undergraduate and graduate students, other faculty members, and alumni, so please spread the word far and wide! Letters should be between one paragraph and one page in length, and they must be descriptive.

Second James D. Goodyear Public Health Service in Baltimore Award

The Public Health Studies program is now accepting applications for the second James D. Goodyear Public Health Service in Baltimore Award. Named in honor of the former Associate Director of Public Health Studies, this award will provide a stipend of $3000 to one Public Health Studies undergraduate student per year, allowing the student to complete an otherwise unpaid public health service internship based in Baltimore City.

Applicants must have already secured an internship for the summer of 2017 in order to be considered for the award. An application essay, describing the scope of the internship and its relevance to your career development, current academics and future goals is required. Click this link for complete requirements and the application.

Applications are due to Caroline Barry by 5pm on April 10th, 2017. Contact the Public Health Studies office with any questions.

If you would like to donate to the Goodyear Award fund, you may do so here.
Politik Focus, Johns Hopkins’ first and only online political video series, invites you to learn more about the world of broadcast journalism!

Our team produces news segments, roundtables, and interviews concerning current events. We provide a unique opportunity for students to gain hands-on experience in broadcasting, producing, writing, and directing. If you want to help shape public opinion on campus and are interested in media, politics, and current affairs, fill out this form: https://docs.google.com/forms/d/1-8zYkxsRi9v8iV1zrAZtq8oYSLAwmUuV3a8x_KV25EI/viewform?ts=58990172&edit_requested=true (its super short, we promise!) or join us at our weekly meeting on Sunday, 4pm, Mattin 161.

For more information email Politikfocus@gmail.com.

Also, be sure to check our Facebook page at https://www.facebook.com/politikfocus/ and our Youtube page at https://www.youtube.com/channel/UC1xUwhr73IC-xlHyEgi7E1w.

Eye Health Survey

If you are currently taking courses at the Bloomberg School of Public Health (including undergraduate students), you are eligible to complete a survey on eye health for a chance to win a $30 Amazon gift card. This survey is being conducted a group of JHSPH students from the Health Communications course (410.654.01) to develop a campaign aimed at improving eye health.

We think your opinions are important and would really appreciate it if you could take some time to complete the 10 minute survey below: https://jhsph.co1.qualtrics.com/jfe/form/SV_0SttZVULzxY7XF3

All answers are completely anonymous. At the end of the survey, you’ll be directed to a separate questionnaire to enter your e-mail address for a chance to win the Amazon gift card. Please direct any questions about the survey to fei@jhu.edu.
Norfolk Waterside Marriott in Norfolk, VA

This four-day conference is aimed at empowering all students interested in pursuing a career in healthcare by bridging their access to our distinguished selection of keynote speakers, admissions panels, and workshops within a variety of health professions. This unparalleled networking experience gives students an opportunity to explore a number of health professions and meet with a vast number of Deans, Vice-Presidents, Directors, and Advisors from the country’s premier healthcare schools, as well as interact with a number of exceptional leading experts and trailblazers in healthcare.

Global Health & Innovation Conference

Attend or present at the upcoming 14th annual Global Health & Innovation Conference (GHIC) at Yale on April 22-23, 2017. GHIC is a must-attend event that convenes more than 2,000 professionals and students who are interested in all aspects of health, development, and social entrepreneurship. The Global Health & Innovation Conference is the world’s largest and leading global health conference as well as the largest social entrepreneurship conference. Please feel free to forward this announcement to others who may also be interested in attending or presenting.

Learn about the GHIC experience: Watch a new short video about the conference here.

8th Annual Undergraduate Conference in Public Health

This spring, Public Health Student Forum is hosting their 8th Annual Undergraduate Conference in Public Health. The organization is now accepting abstract submissions from students interested in doing a poster presentation or a speaking slideshow presentation.

The link for submitting abstract can be found here, and the deadline is 11:59pm on Wednesday, March 15th.
Apply for Health Leads

The Health Leads application is now open for the Fall of 2017! You can apply here: https://healthleadsusa.org/get-involved/volunteer/. If you have any questions, please contact campus.coordinator@bmorehealthleadsusa.org. The deadline is MARCH 14TH AT 11:59 P.M.

Baltimore Collegetown LeaderShape is a unique opportunity for a cohort of JHU students to join with 40 other college students from across Baltimore to learn about leadership and community development. Participants are grouped based on area of interest (education, health care, urban development, sustainability, art and culture) and develop a personal vision describing how they can improve Baltimore through becoming a leader in their field. Please note, this is a yearlong program and all components are mandatory.

Students can find more information and apply to the program at http://baltimorecollegetown.org/collegetown-leadershape/apply-to-the-program/index.html
The Homewood Leadership Weekend is a daylong conference designed for undergraduate students who want to become better leaders in their student organizations, classes and research groups, or off-campus communities. The day is broken up into 120-minute and 50-minute concurrent sessions centered around developing inter- and intrapersonal leadership skills. Lunch is provided for all attendees.

Staff, faculty and students are encouraged to propose sessions until February 27th at www.tinyurl.com/homewood2017
Students will be able to register to attend on HopkinsGroups beginning March 1st.

The Johns Hopkins Urban Health Institute and the JHU Office of the Provost announce the Sixth Annual Symposium on the Social Determinants of Health

Baltimore’s Youth
Reducing Vulnerability to Improve Our Future

Applied Experience

Research Opportunity - Department of Environmental Health and Engineering, JHSPH

Each year thousands of Baltimore communities' pets end up at county/city open admission shelters. The vast majority of these pets are either abandoned or given up by low-income or middle-income families because they cannot afford to care for them or are losing their family home, apartment, or job and must move to a place that does not allow, or charges a security deposit for, having a pet. Many of the people giving up their pet(s), do not have knowledge of or know how to access resources to help them protect their assets and/or provide a "bridge" until they can get on "stable footing" again.

We propose a study that would examine whether it is possible to use this visit to the county/city shelter as an intervention point for people who are (1) close to losing their homes; or (2) having trouble with their landlords. Such an intervention would allow us to identify families at risk and intervene BEFORE they were evicted, or before landlord/tenant problems became severe. It would also reduce the number of animals "turned in" to the shelters.

See more information here.

Korean translator needed for the Global Obesity Prevention Center
Korean translator needed for the various intervention projects in Baltimore through the Global Obesity Prevention Center. The translator will assist our interventionist in store recruitment, translation of promotional materials, training materials and data collection instruments, as well as in intervention activities. Tasks may include regular communication with Korean American store owners via phone and in person visits, store recruitment visits, educational interactive sessions and taste tests, and collection of process evaluation data which may include sales recalls, store environmental assessments, and interactive session process forms.

Contact: Cara Shipley, Research Program Coordinator, cshiple9@jhu.edu

Browse through the Opportunities page on the PHS website to find more details.

Internships & Service

"Community Health Summer Program: Universidad La Sabana, Chía, Colombia"

This academic summer program is offered by the Faculty of Medicine at Universidad de La Sabana in Chía, Colombia, located on the outskirts of Bogotá. The Community Health and Family Medicine program will investigate primary healthcare provision in the Colombian system. Built with a combination of community visits and classroom teaching, this four-week course offers participants an invaluable chance to learn from leading medical professionals about the challenges to implementing community-based programs and measuring the health status of displaced communities. This program will provide unique practical experiences and insights into global health provision through the analysis of a Latin American system that has operated through the trials of a decades-long civil war.

Furthermore, the program offers students the chance to participate in an optional week-long intensive Spanish language course at the La Sabana’s Department of Foreign Languages and Culture. Classes will be designed specifically to develop students’ medical Spanish. This program is open to ambitious undergraduate students, aimed specifically at those interested in a career in public health or medicine in an international context. Students do not have to be fluent in Spanish to take part in the medical program or to join the Spanish language module, because the seminars, classes and mentorships are conducted in English.

For more information, please review the Red Tree Study website at: http://www.redtreestudy.com/unisabana or contact Christine Gregory at christine@redtreestudy.com.
Looking for an applied experience opportunity or something productive to do during summer break? Interested in doing public health-related work abroad? Global Brigades is the world’s largest student-led global health and sustainable development organization. Public Health Brigades is one of its branches and its mission is to empower rural communities to prevent common illnesses through in-home infrastructure development, community leader training, and health education. Our upcoming 7-day brigade is planned for the end of May and we are currently looking for volunteers!

If you have any questions or are interested in coming on the brigade, please contact ehobbin1@jhu.edu for more information!

---

**SBG Health Sciences Summer Internship**

Are you interested in an internship with a growing Small Business team and organization? If so, then come join SBG Technology Solutions (SBG)! SBG is a Service Disabled Veteran Owned Small Business (SDVOSB), specializing in Engineering, Information Technology, Cyber-Security and Training. We are seeking a results-oriented Health Sciences Intern. The ideal candidate for this exciting position, is someone who has a positive and energetic attitude, is hard-working, and possesses the ability to support a fast-paced government contractor. The location of performance is at SBG’s headquarters in Alexandria, VA which is Metro accessible.

**Overview:**

We are seeking a dynamic Health Sciences Intern to support the Health and Benefits division team with daily functions within the division. The Health Sciences Intern will provide administrative assistance to a variety of project managers and leads in the Health and Benefits division including working on a variety of special projects. Intern candidates should be transitioning from their junior to senior year in college and have health sciences as their major.

**Primary Responsibilities:**

- Administrative reception duties to become familiar with SBG’s client base
- Filing and organizing contractual documents
- Reviewing technical business proposals for clarity and cohesiveness
- Providing miscellaneous technical support to portfolio managers
- Other duties as assigned

**Requirements:**

- Completed junior year and transitioning to senior year in college.
- Possess proven organizational skills with a strong attention to detail and the ability to prioritize and work well in an environment with dynamic demands.
- Possess excellent verbal and written communication skills.
- Proficient with Microsoft Office tools (i.e. MS Word, MS Excel and MS PowerPoint).
· Flexibility and adaptability; able to shift attention and focus to different priorities.
· Pursuing a health sciences related degree.

Please visit us at www.sbgts.com and if you are interested this opportunity, please do not hesitate to send your resume to kthomas@sbgts.com. We look forward to hearing from you.

Please include a cover letter on “Why you would be an ideal candidate for the Health Sciences Internship position”. Resumes without a cover letter will not be considered.

---

**Johns Hopkins Hospital Administrative Internship**

The Johns Hopkins Hospital Administrative Internship is a yearlong, paid full-time position aimed at highly motivated individuals who are interested in pursuing a career in medicine and are currently looking for gap-year opportunities. The internship is designed to provide aspiring physician leaders with a comprehensive learning experience at a premier academic health system. Program participants will be exposed to hospital operations and leadership through project-based work. Project opportunities will vary and reflect both the participant’s learning goals and the needs of the hospital. In addition to project work, candidates will have the opportunity to attend senior leadership meetings and gain exposure to various health system functions. Prior to beginning, the selected intern will finalize goals, expectations, and evaluation criteria with Executive Leadership and the Internship Program Manager. For more information on the internship or to apply, please see the linked [document](#).

---

**Research in Maternal & Child Health**

The Child & Adolescent Health Measurement Initiative (CAHMI) at Johns Hopkins School of Public Health is looking for a motivated, self-directed intern. The **Spring Undergraduate Maternal and Child Health Measurement Research Network Internship** position will primarily work on our Maternal and Child Health Measurement Research Network (MCH-MRN) project, with a focus on website upkeep, outreach and dissemination, and creation of documents for topical Technical Working Groups (TWGs).

More information and application requirements [here](#).
World Health Organization, Substandard and Falsified Medical Products Group

The Safety and Vigilance (SAV) Unit within Regulation of Medicines and other Health Technologies (RHT) is looking for an intern to work on the Global Surveillance and Monitoring System for a minimum period of two-three months in the summer of 2017 (timeline is flexible).

The World Health Organization (WHO) has a mandate to tackle substandard, spurious, falsely labelled, falsified and counterfeit (SSFFC) Medical Products, as part of WHO’s fundamental role in protecting public health. There is a recognized lack of reliable and verified data of the global scope, scale and harm caused by SSFFC medical products. In response, WHO has developed the Global Surveillance and Monitoring System (GSMS), which is designed to significantly improve the quantity and quality of data on SSFFC medical products, whilst providing operational support when and where required. Further information on the activities of the GSMS is available here: http://www.who.int/medicines/regulation/ssffc/en/

National Association of Health Services Executives, Baltimore Chapter
Summer Internship Program 2017

The NAHSE Internship Program is a summer enrichment program in health and health services administration for talented undergraduate and graduate students who possess the aptitude and skills required to work in a complex multidisciplinary healthcare environment. The Program Includes:

• 8 - 10 week practical work experience in a healthcare organization
• Summer internship stipend (compensation based on level of education)
  • Assigned mentor and preceptor
  • Educational and developmental seminars
• Free attendance at NAHSE, Baltimore chapter meetings and seminars

Information packet and application here

Internship with The University of Michigan Center for Value-Based Insurance Design

The University of Michigan Center for Value-Based Insurance Design (V-BID Center) currently has openings for the 2017 Undergraduate summer internship program. This is a paid position located at the North Campus Research Center in Ann Arbor, MI. As a non-profit embarking on its 12th year of growth and success, the V-BID Center leads in research, development, and advocacy for innovative health insurance plans. Since its inception, these values have inspired important public policy ventures as the Center has positioned itself at the heart of the national healthcare and reform debate. The V-BID summer internship program affords undergraduate students the opportunity to integrate themselves into the vast, fast-paced world of public health policy. Upon joining our multidisciplinary team, interns will participate in hands-on, collaborative experiences as they gain a better understanding of various facets of health care policy. Throughout the Summer, each intern and their unique contributions will become an integral asset to our work.
Cyber-HealthGIS - Multidisciplinary Research Experiences in Spatial Dynamics of Health

We are pleased to announce that the National Science Foundation-funded interdisciplinary REU Site: "Cyber-HealthGIS - Multidisciplinary Research Experiences in Spatial Dynamics of Health" at Texas A&M University in College Station, TX is currently accepting applications for the 2017 summer.

http://cyberhealthgis.tamu.edu

This 10 week program invites undergraduate students from all disciplines who are interested in pursuing research at the intersections of technology, geospatial analysis, mapping & visualization, and human health and well-being.

The program seeks to bring together 10 undergraduate students for this summer, with 1/3 coming from Geography & GIS, 1/3 from Computer Science & Engineering, and 1/3 from Public Health, Bio, and Pre-Med programs. Students from allied STEM disciplines with interests that match the program are invited to apply as well. All you need is a passion for geography, technology, and/or health!

Participating students will be provided with funding for a stipend/salary for the whole summer, funding for housing and meals during summer-long program, and funding for transportation to and from College Station TX. College freshman, sophomores, and juniors as well those who will be graduating in December of 2017 are welcome to apply.

The application deadline is March 15, 2017 so please apply as soon as you can!!

We are particularly seeking to recruit members of underrepresented groups in science which include but are not limited to women, persons of color or other minority groups, veterans, persons with disabilities, as well as those from two- and four-year College and Universities that do not provide students with opportunities to engage in undergraduate research.
Consortium for Advanced Studies Abroad (CASA) in Cuba (Summer) Healthcare in Cuba: Cultures and History of Medicine/Spanish for Healthcare Workers

At a Glance:

Two Courses: Healthcare in Cuba: Cultures and History of Medicine and Spanish for Healthcare Workers
Location: Havana, Cuba
Credit: Each course is worth 4 U.S. semester hours/credits
Pre-requisite: No pre-requisite for Healthcare in Cuba course (taught in English); two years of college-level Spanish or equivalent required for Spanish for Healthcare Workers course
Approximate Dates: June 3 - July 1, 2017
Application Deadline: March 15, 2017

More information here

2017 Public Service Scholars Summer Fellowships
All applications are due on March 15th.

Public Service Scholars programs provide paid fellowships for Maryland's "best and brightest" college students. Fellows are placed in full-time summer internships in government agencies or nonprofit organizations across the state, and are mentored by senior-level professionals. Fellows attend seminars, trips, and events with their cohort, have the opportunity to learn from and network with state leaders and program alumni, and work on substantive projects culminating in presentations to Maryland's leaders.

Eligible students ...
...are attending a Maryland institution (public or private)
OR
...are a Maryland resident attending school out of state
...will be a Junior of Senior in Fall 2017 or graduate student (eligible only for the Nonprofit Leadership Program)
...are in any major
...have a GPA of 2.7 or above
...will be available during summer 2017 program dates
...have an interest in public service

For more information visit publicservicescholars.umbc.edu.

Internship Opportunities at Greentech’s U.S. Biologics Technical Development

Genentech's U.S. Biologics Technical Development (USBTD) develops, delivers and supports robust, cost-effective production methods and technologies. The group has long been recognized as a world leader in developing large-scale manufacturing processes, sophisticated analytical methods and effective drug delivery systems. To learn more about our research and development processes, check out our Making Medicine site. We have numerous opportunities for current students and recent graduates in engineering and science programs alike to help deliver the future of medicine to
patients.

**For current undergraduate and graduate students:**
Genentech’s internship programs offer undergraduate and graduate students the chance to work at one of the leading companies in biotechnology. See flyer attached for more info. For consideration for a summer internship (3 months) or a spring/fall internship (6 months) opportunity, apply to JobID 00448594 (Spring Intern), 00448599 (Summer Intern) or 00448587 (Fall Intern) on gene.com/careers and submit your resume to Handshake (tracking code: 478561 for Summer 3-month internships, 478560 for Spring/Fall 6-month internships).

**For undergraduate and masters level students in the Class of 2017 and recent graduates:**
Genentech offers a variety of rotational programs geared towards giving recent graduates in-depth training and skill development. Students looking to gain experience in USBTD should apply to the Process Development Rotational Program (PDRP). If technical operations leadership opportunities better suit your career interests, apply to Genentech’s Operations Rotational Development Program (ORDP). See flyers attached for more info on these programs. Applications for these programs are currently open and are accepted on a rolling basis so apply now to JobID 00448264 for PDRP or 00448553 for ORDP on gene.com/careers and submit your resume to Handshake (tracking code: 478737 for PDRP, 478742 for ORDP).

For more information, please email yang.jessica_p@gene.com ortschudi.katherine@gene.com.

---

![Baltimore HIV/AIDS Scholars Program](image)

**Apply to the 2017 Baltimore HIV/AIDS Scholars Program**

In a 10-week program, students conduct research under the direct mentorship of established Johns Hopkins researchers with the purpose of advancing science in the fields of HIV prevention and treatment that are specifically of relevance to the HIV epidemic in Baltimore City. Your specific research project will depend largely on research areas of our faculty. Overall, you can expect an experience similar to that of a first-year graduate student who does a three-month rotation in a laboratory or out in the community to become acquainted with the project, techniques, and people working in that area. While the style and character of each research site varies considerably, all are composed of very dedicated and hardworking individuals who are more than willing to help others who are similarly committed to learning. The program culminates with the development of a scientific abstract and poster presentation. The posters are presented to CFAR at the conclusion of the program and to the university community in the fall semester.

Applications Due March 17.

Apply via Handshake, but details can be found on the [CFAR website](https://www.cfar.jhu.edu/) and this flyer.
Have you viewed the following options?

The Krieger School of Arts and Sciences offers an incredible array of opportunities for student researchers in the areas of natural science, social science, and humanities. In addition to the three main undergraduate research awards—Woodrow Wilson, DURA, and PURA—explore the additional links posted on the KSAS Research Site.

For a complete list of fellowships, grants, honors, and awards available to Krieger School undergraduates, visit the undergraduate academic advising site.

Students are also invited to look beyond the School of Arts and Sciences for research funding. Johns Hopkins is committed to providing support for students interested in applying for nationally competitive fellowships.

Learn more about the JHU National Fellowships and Scholarships Program.

Employment

Research Employment Opportunity:
Community Health, Crime, and Safety: A Comparative Longitudinal Study of Drug Hot Spots

Faculty in the School of Criminology, Law and Society at George Mason University are conducting a study to examine how neighborhood social and ecological conditions effect health, fear, and safety outcomes of residents. This research is taking place in Baltimore, Maryland. It is a five-year project funded by the National Institute of Drug Abuse, which is a division within the National Institutes of Health. The study is being led by Dr. David Weisburd and Dr. Danielle Rudes from George Mason University, Dr. Brian Lawton of John Jay College of Criminal Justice, Dr. Justin Ready of Griffith University, and Dr. Amelia Haviland of Carnegie Mellon University.

We are recruiting enthusiastic undergraduate and graduate students to participate in the study as employees. Job responsibilities will include conducting door-to-door resident surveys and systematic observations of street conditions in Baltimore City, Maryland. Most data collection will take place from April through October. This is an exciting opportunity for students to obtain research experience, and it may be beneficial in preparing to enter the job market or graduate school.

**Employment details and prerequisites:**
- Current advanced undergraduate (Junior or Senior) or graduate student
  - Good academic standing
- Base hourly compensation will be $12 per hour with higher wages for students who assist with project coordination and quality control.
  - Average 20 hours per week
  - Shifts will be 5-9 hours long
- Need to feel comfortable knocking on strangers’ doors in unfamiliar neighborhoods
  - Attend in-person training sessions, no exceptions
- Display an understanding of study content and concepts
• Ability to meet the travel requirements of the project in Baltimore, MD

**Actively seeking employees with vehicle to transport research team between sites**

**Spanish-speakers needed**

Looking for people with strong interpersonal skills, can speak and communicate effectively, can learn quickly and are highly motivated to work. Must be a strong team player and a problem solver.

If you have any questions concerning the research study, or if you would like to participate in this research study, please email health.safety.study@gmail.com.

---

The Congressional Budget Office (CBO) Seeks an Assistant Analyst for Health Analysis

The Congressional Budget Office is a small nonpartisan agency that provides economic and budgetary analysis to the Congress. CBO's Budget Analysis Division seeks an Assistant Analyst to work within its two health analysis units. This position is open only to candidates who have or are completing a bachelor's degree; it is not for those who have or are completing a master's degree. This is not a permanent position: At the end of a two-to-three-year appointment, Assistant Analysts typically leave CBO to continue their education in such disciplines as economics, public policy, medicine, or the law.

Tasks will include monitoring Medicare demonstrations and the implementation of major health care legislation; collecting and analyzing data; conducting literature reviews; and developing and producing summaries, charts, and tables. The division's health analysts work closely with key Congressional staff on U.S. health care policy, preparing multiyear spending projections for federal health care programs such as Medicare, Medicaid, the health insurance marketplaces, and the Public Health Service.

Interested candidates should submit a cover letter, résumé, brief writing sample, unofficial transcripts, and contact information for three references online at www.cbo.gov/careers.

Click this link for more information.

---

Department of Anesthesiology & Critical Care Medicine (ACCM) Research Opportunity

As part of its clinical research program, the ACCM department is searching for research assistants to help with the multitude of clinical studies/trials ongoing in the ORs and ICUs. We are interested in degree graduates seeking research experience/health care employment for at least 1 year. If you are interested, and would like more information, please contact Beth White, RN, research nurse manager at 443-287-5837 or ewhite11@jhmi.edu.

---

Center for Drug Safety and Effectiveness Research Coordinator

The Johns Hopkins Center for Drug Safety and Effectiveness, housed in the School of Public Health, is looking for a Research Program Coordinator to begin as soon as possible. Research projects span a wide variety of topics and areas, including the prescription opioid epidemic, pharmaceutical regulation and pharmaceutical policy, as well as other areas related to drug safety and effectiveness.
We work with a number of physicians, epidemiologists, pharmacists, biostatisticians, among other specialists. Candidates should have a background in epidemiology or public health.

Interested candidates can find the full job description and application here.

Send your resume, as well as any questions you may have, to Dora Lin at dlin25@jhu.edu.

---

**Research Program Assistant Positions at Hopkins Center to Eliminate Cardiovascular Health Disparities**

The Johns Hopkins Center to Eliminate Cardiovascular Health Disparities is hiring 9 part-time (18 hrs/wk) Research Program Assistants to help with patient recruitment, interviewing, surveying, tracking, and data entry for the RICH LIFE Project—Reducing Inequities in Care of Hypertension: Lifestyle Improvements for Everyone. We are committed to building a culturally diverse group and encourage applications from minority candidates.

Full description posted on the Careers site here.

---

**FDA Center for Biologics Evaluation and Research (CBER) Seeking Post-Baccalaureate Fellows**

We are looking to fill 3 or 4 one-year post-bac positions in our bacterial genetics lab (under principal investigator Scott Stibitz) at CBER/FDA starting this summer. We are looking for recent grads with some experience with bacteriology and molecular biology. Post-bacs will be working on different projects (Staphylococcus aureus pathogenesis and genetics, Salmonella acid resistance, Shigella vaccine development, Bordetella genetics, and probiotic assay development), but all projects would involve a good deal of cloning and some protein expression. Our lab is within a research branch of the Center for Biologics Evaluation and Research (CBER), located in a new facility on the Food and Drug Administration headquarters main campus at White Oak/Silver Spring, Maryland.

Interested candidates should email their resumes to Roger Plaut at Roger.Plaut@fda.hhs.gov.

---

**Clinical Information Manager (CMI)**

The Emergency Medical Associates (EMA) is looking to hire individuals that can work as Clinical Information Managers (CIMs) / Medical Scribes in their Emergency Departments. The CIM position offers a unique opportunity to gain exposure to the clinical field.

Emergency Medical Associates (EMA) is one of the most respected emergency department (ED) practice organizations in the United States and treats more than 1 million patients annually, while serving more than 30 hospital clients. The company is widely recognized for clinical excellence, as well as the ability to increase patient volume, turn around ED operations, and improve and sustain patient satisfaction.

The CIM works in an Emergency Department to provide clerical/administrative assistance to the ED physician and/or practitioners. They prefer candidates who are interested in the healthcare field and have at least 100 hours working or volunteering in healthcare, and an academic background in sciences/pre-med classes. They currently have full time and part-time positions available in New York.
Jersey, New York, Pennsylvania (Lebanon), and North Carolina! They are looking for current students and alumni for Immediate and Summer 2017 starts.

Being a CIM provides you with a competitive advantage by placing you a step ahead in your career development. If interested in learning more about this exciting CIM position with Emergency Medical Associates, visit their website.

Click here for the “Top 5 Reasons to Work as a CIM”
Click here for the official CIM job listing
Click here for the CIM Client Hospital Location Map

---

**Research Assistant Needed**

The purpose of the position is to assist full-time faculty member in various projects including but not limited to health services research, community based participatory research projects in cancer and cardiovascular disease, grant development, literature searches and reviews, service learning programs, community-based health and organizations.

Rate per hour: $8-10
Hours per week: 6 – 10
Employment Period: July 1 – open
(The position is for Summer but it can be extended into the Fall Semester)

Click here for more information.

---

We are currently recruiting for two entry level positions, with multiple spots for each:

**Member Advocates:** Member Advocates are driven by empathy. We put the “care” back in healthcare. We shatter member expectations by providing above and beyond service. As experts in health benefits, Member Advocates are not only the face of the company, but are the voice behind innovation across every department. Through your experience at Collective Health, you will immerse yourself in the rapidly-evolving health insurance industry while mastering skills in operational efficiency, cross-departmental collaboration, and external professionalism.

**Operations Associates:** Each Operations Associate is part of a small team that runs every aspect of a customer's health plan - eligibility, claims, coordination of benefits, reinsurance. In this role, you will learn more about how insurance and healthcare actually work than any other position in the industry - you will essentially learn how to operate a healthcare insurance company. You will work across every department at Collective Health and be responsible for operating and scaling the core of our business. Through your experiences at Collective Health, you will become an expert in operations and in health care, while being at the forefront of transforming the industry. We're looking for candidates with a strong academic record. An interest in healthcare is preferred. Our approach in everything we do is collaborative, open and curious. We're looking for more passionate, driven people to join our growing team.
Please reach out to Danielle DiPersia, Hopkins Class of 2014, with any questions!

Research Employment Opportunity

We are recruiting enthusiastic undergraduate and graduate students for field researcher positions on a large research project. Job responsibilities will include conducting door-to-door resident surveys and systematic observations of street conditions in Baltimore City, Maryland. Most data collection will take place from April through October. This is an exciting opportunity for students to obtain research experience, use as an internship, and it may be beneficial in preparing to enter the job market or graduate school. Please email health.safety.study@gmail.com if interested in applying or have any questions.

Degree Programs

Milken Institute School of Public Health at George Washington University

The George Washington University Milken Institute School of Public Health has many different MPH programs, including Biostatistics, Epidemiology, Public Health Nutrition and Global Environmental Health. The overall focus is to prevent injury and disease within the population and help increase the overall health level of the nation or the world in general. The program is a classroom based program that is capped off with a practicum. To learn more, visit http://publichealth.gwu.edu/academics/graduate/masters-programs.

PHS Weekly Submission Process

Public Health-centric student groups and health-related organizations around Hopkins and the Baltimore community are welcome to submit announcements to the PHS Weekly. Please submit to PHStudies@jhu.edu by 5pm every Monday.

For announcements or events, please submit the title, date, time, location and a brief description. The description should be brief and preferably include a link that will direct readers to another site for complete details.

For any position opening, please submit the position title, organization name, responsibilities and eligibility requirements, deadline for applying and contact information. Once again we ask you to keep the posting brief and provide an outside link for readers to gather further details.

PHS Office Directory

Maria Bulzacchelli, Director, mbulzac1@jhu.edu
