Society for Neuroscience Conference
Travel Grant
November 11-15, 2023

Society for Neuroscience is the world’s largest organization of scientists and physicians devoted to understanding the brain and nervous system. The organization was founded in 1969 and has almost 40,000 members in more than 90 countries and 130 chapters worldwide. SfN’s mission is to help people better understand the brain and the nervous system, provide professional development activities and resources to all educational and career levels, promote general education about science to others and inform policymakers and legislators about recent developments and progress made in the science field.

The Neuroscience Program provides up to 50 students with an opportunity to attend the SfN conference using the travel grant. This year’s conference is in Washington DC, so we have funds available to send up to 50 students. Please let Rodney Williams know if you would like to attend by filling out this form and returning it to the Neuroscience office (Dunning 434). The chosen students will be given a maximum travel grant of $300 to include the Registration ($135) Fee and SFN Membership Fee ($34).
