### Library and Librarian Access During the Campus Closure

Please see below some info on the library resources available to you!

*Good news:* In response to the situation, some publishers have made more of their ebook collections available to libraries. Therefore, you will be able to get even more ebooks.

- **How to find them?** Use Google or Google Scholar. The ebooks that are suddenly now available will NOT be in the JHU catalog, so just look for them any way you want to -- put in some search words or a book title, and go from there.

- **What about journals?** We haven't heard much about more journal content becoming available. But please remember that the easiest way to find what YOU have access to is this:

  -- **library home page** --> Articles and Databases
  -- Click the tab for GOOGLE SCHOLAR: when you do your search, this will show you the links for FINDIT@JHU, even if you are not logged into anything
  -- NOTE: Usually, you would click on the FINDIT link to take you to a page that will show you ALL of the ways to get full text. But for now, you should FIRST click the article title, because the article may be one of the ones that's suddenly available but *not* in our catalog.

- **Big news:** As of June 29, you can request and pick up library books. **On that day:** the REQUEST buttons will reappear in the library catalog; things you request will be delivered to any of the available libraries, checked out, and made available for you to pick up. [Details are on this page](#) (scroll down to "Book Request Service").

  - If you have any questions about any of this, please send a note to circmail@jhu.edu.

### Contact the Library

- Text 410-692-8874
- [ask@jhu.libanswers.com](mailto:ask@jhu.libanswers.com)
- Live Chat -- [library home page](#), purple box on bottom right
- Or just send an email to the PHS librarian, Sue Vazakas.

The 17th volume of the Epidemic Proportions journal, the premier undergraduate public health journal of the Johns Hopkins University, has been published! To encompass the role that our humanity has played in our public health achievements, the theme for the 17th volume is “The Human Connection.” All articles in this volume highlight the importance of the collaborative human spirit in allowing us to reach one milestone after another.

Check out the full online version at: https://issuu.com/epidemicproportions/docs/vol17-2020

Attention Rising Seniors: First Term Course at JHSPH
Cards for Courage is a newly formed non-profit volunteer organization founded by three college students at Johns Hopkins University. Originally, the mission of the nonprofit was to provide emotional support to hospital patients through sending hand-drawn cards with uplifting messages. In light of the COVID-19 outbreak, we decided to shift our focus to a nation-wide project: making appreciation cards for healthcare workers and support staff serving on the frontline in hospitals across the U.S. Our nurses, physicians, pharmacists, janitors, maintenance workers, etc are putting their own health at risk to keep our communities safe.

If you are at home and have some free time on your hands, please consider joining our initiative! No previous art experience is necessary. Simply fill out this quick form to help us put smiles on some faces during these trying times. Questions or comments? Email cardsforcourage20@gmail.com or message us on Facebook.
Take APHA's Billion Steps Challenge!

The American Public Health Association has challenged members to get our public health community to log 1 billion steps.

Looking for: Science and Technology writers for The News-Letter

Looking to improve your writing for med and grad school applications? Are you interested in learning more about research at Hopkins? Want to stay up to date on developments in tech and the physical, biological, and social sciences? Join The News-Letter SciTech section as a writer!
Writers for the Science and Technology section cover scientific breakthroughs and achievements on campus and around the world, interview members of the Hopkins community (including students and professors), and write articles published in the weekly edition of The News-Letter.

No prior experience is required, and there are no preferred majors. Email science@jhunewsletter.com for more information.

**SPEAK2US Hotline**

The SPEAK2US hotline, launched in 2016, is geared toward the university and health system communities to report complaints or concerns related to harassment, discrimination, or other unacceptable behavior that takes place at Johns Hopkins. Reports can be made 24 hours a day, seven days a week via an online form or by phone at 844-SPEAK2US (844-773-2528). Students, please be aware of this resource.

**Unpaid Internships and Service**

**Call for UG Interns at CAHMI**

Do you want experience in public health research in Maternal & Child Health? The Child & Adolescent Health Measurement Initiative (CAHMI) at Johns Hopkins School of Public Health is looking for a motivated, self-directed intern. The mission of the Child and Adolescent Health Measurement Initiative is to advance patient-centered innovations and improvements in children’s health and health care quality. The Undergraduate Intern will primarily work with the CAHMI’s Data Resource Center (DRC) project and may assist with other projects as needed.

Main projects that an Undergraduate Intern may work on include: Assist in preparing and double-checking data regarding child, maternal, and family health; provide support for various tasks related to the launch of upcoming NSCH data, including creation of supporting documents and entering data into Survey Manager; help to create “data snapshots,” or interactive data reports using NSCH data; help with the assembly of grant reports, technical assistance manuals, PowerPoint presentations, and video trainings; assist with outreach and dissemination of DRC materials and tools, including social media, newsletters, blog posts, and more; assist with literature reviews and identifying resources for a variety of projects, as needed; perform other related duties as required.

**Applicant Qualifications/Requirements**: Applicant must be a current undergraduate student at Johns Hopkins University enrolled in a major related to the health or social sciences field. Interest in research and measurement, especially in the topic of children’s health, is preferred. MS Office skills required; some exposure to MCH measurement and website creation or upkeep preferred. Strong writing and communication skills required. Applicant must have strong attention to detail and a basic understanding of research principles.

**Work Schedule**: 6-12 hours per week, flexible within business hours and to be determined with applicant. May need to work after hours (after 5pm and weekends). All work will be remote until further notice.

**Directions on how to apply**: Send resume, brief cover letter, and schedule availability to r poblet1@jhu.edu, with the subject line “Undergraduate Internship”.
Volunteer Opportunity at the Johns Hopkins School of Nursing

Dr. Bushra Sabri, Assistant Professor at the Johns Hopkins School of Nursing is leading a study called the BSHAPE which focuses on improving immigrant women’s lives in the US by building knowledge and skills in a variety of health-related areas. The study is approved by the Johns Hopkins University institutional ethical board. Our team is required to follow all ethical guidelines in interacting with participants (e.g. protecting privacy and confidentiality). Please click on this link for more information on the study: https://ganm.nursing.jhu.edu/the-bshape-study-la-investigacion-bshape/

We are currently looking for student volunteers who would be interested in getting involved, helping us recruit participants (i.e African women) and learning more about the BSHAPE study itself. Additionally, this will allow the students to gain great insight and experience into the field of research.

If interested, please email Dr. Bushra Sabri at bsabri1@jhu.edu or the BSHAPE coordinator Meron Gebreeziabher at mgebree2@jh.edu with questions or call 301-728-1101.

Research Assistant Position at The JHSPH Department of Health Policy and Management

General summary/purpose:
The student will be involved in a research project which aims to identify the types of behavioral interventions needed to improve child passenger safety in the for-hire environment, which includes ridesharing and taxis. Given the effectiveness of child restraint systems (CRS) in reducing the risk of crash injury for children, the goal of this research is to ensure that advances in personal mobility in the U.S. are not accompanied by setbacks in child passenger safety.

Description of Duties:
• Conduct online search of ride share company practices
• Make email and telephone inquiries to major rideshare companies requesting information on their policies for requiring/encouraging CSS and/or seat belt use for children under 13.
• Describe current company practices, both national and international, for providing CRS in for-hire motor vehicles.
• Conduct literature searches to support faculty in research efforts. Design and format papers/publications.
• Provide regular updates of project status to the study team

Preferred Qualifications:
Prior collaborative research experience desired
Attention to detail

To apply, please send a resume and cover letter to Wendy Sheilds (wshield1@jhu.edu)

Volunteer Graphic Designer Needed for World Neurology Foundation

The World Neurology Foundation (www.worldneurology.com) is a non-profit organization that promotes neurological care and education in low-resourced regions. We are currently in need of a
volunteer graphic designer who can design the logos of our upcoming projects, “Toolkits for Africa” and “Neuroshare,” and provide support for promotional materials. If interested in this temporary role, please send several samples of your previous work to shwang37@jhu.edu, and we will get in contact with you if we are interested in collaborating with you. The selection of a graphic designer will be on a rolling basis.

World Neurology Foundation

Summer Research Assistant Position with Health Security Start-U

Background:
Do you have superior research skills that you can volunteer in an effort to get the world back on its feet? Civilience is a health security platform that helps people engage safely in the business of life – work, study, travel, entertainment – by identifying infectiousness (pandemic or seasonal), through symptoms and vitals data obtained from integrated software app and hardware accessories. We are a startup in stealth mode, because we are the only proactive tool that safely screens individuals well before their activity – allowing for better planning, increased productivity, reduced liability, and above all, a world with our full participation. We are growing quickly and are seeking to compile a list of the policies, guidelines, and regulations that are determining whether and under what circumstances people are allowed to go back to work during the COVID-19 pandemic. This position is ideal for an undergraduate student with strong research skills and an interest in infectious diseases, health information technology, and/or health policy.

In this role, you will be able to:

- Identify the relevant institutions/agencies/organizations that issue such regulations and guidelines, including but not limited to multilateral (WHO, UN, etc.), national (CDC, NHS, etc.), regional state (e.g., 50 states), local (e.g., NYC), industrial/labor boards (e.g., OSHA, HSE), etc.
- Set up the research structure with the company so that the changes in guidelines and regulations can be updated as issued by the authorities.
- Distill the guidelines and regulations into a form that can be entered into a computer database (e.g. “x” temperature in state “y” means “stay home”)

Specifics:

- Start date: Now!
- Duration: July & August

While this is an unpaid position, we are happy to work with you and the University to ensure that you can earn academic credit for your work (if applicable). Additionally, we are happy to serve as references and provide you with recommendation letters in the future.

To Apply:
Please send a resume highlighting your previous research/work experience and/or academic coursework in relevant areas (i.e. health policy, epidemiology, qualitative research), and a link to your LinkedIn profile to hr@civilience.network.
Volunteer Opportunity - Fight COVID-19 with Science

Public Health Majors needed to volunteer to help Professor Bishai and his team do quality checks of COVID-19 epidemic curves from 3000 US Counties. Spend 2 hours per week quality checking AI-based detection of COVID-19 apices in all US counties. Training takes 30 minutes. If interested contact Dr. Bishai dbishai@jhu.edu and Colette Chang cchan125@jhu.edu

Recruiting Students for Student-Run Startup

OtoGlobal Health LLC is a student run startup which started 4 years ago. We have developed a low-cost hearing screening device optimized for conducting infant hearing screening in low-resource settings. It consists of hardware components like circuitry and 3D-printed pieces, as well as software on an Android app that controls the device. We are looking to recruit new members to join the team starting this fall, and we would love to hear from you if you are interested!

We have a clinical study at the hospital starting this fall, so right now is a really exciting time to join the team since the results from that study will push us towards the next stage of product development.

We have also won multiple business plan and design competitions and are well positioned with a patent to move us closer to a marketable device!

If this sounds interesting to you, please reach out to the team! We are looking to recruit people with interests in the following:
• Business development (Any interest in business plans, business competitions, etc. is very valuable. If you don’t have any experience but you would be interested in learning about and applying yourself to the business side of engineering, that’s awesome too.)

To apply, please send a resume and a couple sentences explaining why you’re interested to gmischl1@jhu.edu. If you have any relevant experience, make sure it’s in your resume. If you have any questions, feel free to contact that email as well.
Please see the PHS website (Contact tab) or click here to use the online Advisor Scheduling System.

* Please note – system does not work with Chrome or Safari browsers or mobile devices

**PHS Weekly Submission Process**

Public Health-centric student groups and health-related organizations around Hopkins and the Baltimore community are welcome to submit announcements to the PHS Weekly. Please submit to cbarry8@jhu.edu by **5pm every Monday**.

For **announcements** or events, please submit the title, date, time, location and a brief description. The description should be brief and preferably include a link that will direct readers to another site for complete details.

For **any position opening**, please submit the position title, organization name, responsibilities and eligibility requirements, deadline for applying and contact information. Once again we ask you to keep the posting brief and provide an outside link for readers to gather further details.
